Press Release

IBAX Co. Ltd.

"SECUREFORCE V3.0" Release by IBAX.

～ more advanced cloud log analysis service ～

IBAX Co.,Ltd. (Address: East Nanba-cho, Amagasaki City, Hyogo Prefecture, Japan. CEO: Iba Masahiro, hereinafter IBAX) is pleased to announce the release of "SECUREFORCE" new version 3.0 today.

The new version not only retains the features of SECUREFORCE such as "easy to understand" and "low cost" by visualizing the Firewall/UTM, but have the following functions which makes it possible to expand the service from SMBs to large-sized enterprises.

【New functions of SECUREFORCE 3.0】

1. Much higher analysis and display speed.
Acknowledged analysis speed is improved to up to 30 times higher (* compare to the past).
2. Application use analysis is added.
Support the analysis of "application control" through the Internet.
3. Operational monitoring function is added.
Keep track of the real operation information of Firewall/UTM.
4. A new dashboard is installed as standard equipment.
Access statuses of last 2 days are displayed by country on the map.
5. Correspond to large-sized enterprise model.
Expand support to middle and large-sized enterprises model.

【When the Service is Available】

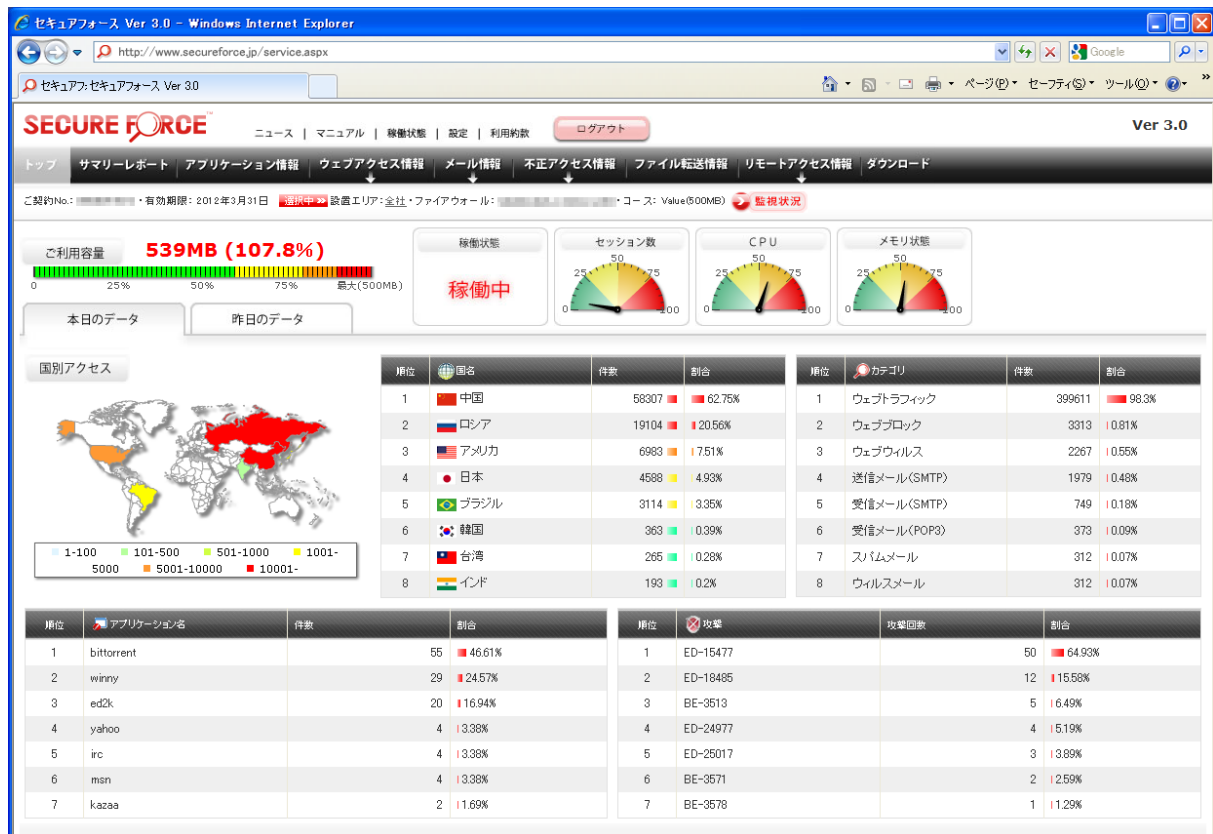

Middle of September, 2011

【How to Have the Service】

The service is provided through SECUREFORCE partner (distributors). SECUREFORCE V3.0*1 will be provided free of charge to the customers who are currently having the SECUREFORCE service.

*1 As for the new function of application use analysis, updating to premium license is necessary.

Moreover, specialized "forApp license" for application detection and control is available.

※The above is an image of "Secure force V3.0" which has been developed.
